

Are you a qualified Psychotherapist or Counsellor? Have you worked with a client who has a speech or communication disability?

Participant criteria:

I am looking for clinically qualified psychotherapists or counsellors (Level 4 or higher) with **experience in delivering therapy to individuals with speech or communication difficulties** to take part in my MA research. This may include working with clients with fluency disorders (e.g., stuttering), developmental communication disorders (e.g., DLD), or acquired neurological or medical conditions impacting speech or language (e.g., dysarthria, aphasia, apraxia of speech).

What does taking part involve?

- A short phone conversation or email exchange to confirm eligibility.
- A one-hour meeting on Zoom in which you would be interviewed about your experience.

What is the purpose of the study?

I hope this research will deepen understanding within the field and provide insight that may be useful for practitioners and policymakers working to enhance accessibility.

How can I find out more/ apply to participate?
