

Are you a counsellor or psychotherapist who was diagnosed* neurodivergent in adulthood?

Research Participants Needed

To participate in a study, which aims to explore the experiences of neurodivergent therapists and their perceptions of clinical practice.

The research seeks to centre neurodivergent therapists' voices, to hear, understand and make meaning of neurodivergent experiences, and build a better understanding of neuro-affirming approaches in counselling and psychotherapy.

About you

- A qualified counsellor or psychotherapist
- Currently practising
- Based in UK
- Diagnosed neurodivergent later in life, as an adult

About participating

- 1 confidential, online interview (45-60 mins)
- Participation is voluntary and fully anonymised

About me

- Hi, I'm Pip (she/her)
- late-diagnosed neurodivergent counsellor
- MA student in Integrative Psychotherapy at The Minster Centre
