

I am looking for any counsellors who are registered with the BACP and who have experience of working with autistic adults experiencing bereavement.

About me: Hi my name is Hazel Edwards and I am studying for a BA (Hons) in Integrative Counselling at New City College in Hornchurch.

What is the research project about? I am conducting a research project, exploring counselling autistic adults experiencing bereavement.

How will I manage the data collection? I will interview four participants separately, via Microsoft Teams which will take no longer than 1 hour. I will ask each participant 10 core questions which will be emailed to you the week before the semi-structured interview. The interview will be recorded and transcribed so that I can analyse the data using Thematic analysis. You will not be required to have your camera on when participating or use your real name. All personal details will be kept confidential and data will be anonymised.

Who am I looking for to take part? I am looking for BACP registered UK based counsellors who have worked with autistic adult clients experiencing bereavement.
