

Accredited Counselling and Psychotherapy Services

Services available in specific counties across the UK

This provides a quick and easy resource to check if there is a BACP Accredited Service accessible in your local area, listed by UK home country and county - Services are listed under the counties in which they provide counselling and psychotherapy, and some have venues across county lines. Eventually there will be a search facility provided on the main directory webpage.

Please note - many organisations with an accredited service will also provide other support services that are not eligible to be accredited with us - such as advice, training, advocacy, mentoring, befriending and a range of other non-counselling related help.
